

- **.CSV File**
  - Comma Separated Value file
  - **Create in Excel**
  - Separate using commas
  - Save as a CSV
- **Changes to Materials file**
  - Relabel Materials A & B to match S/Sh columns to Talker
  - Change the Xs, Xsh to ?s, ?sh → File names too?
    - **Cannot have ? in file names; leaving as X**
  - Add note about which talker to attend to
    - Lists **not** influenced; instructions will be different
- **Catch Trials**
  - Type 2 catch trials → **Filler Word Pairs & Nonword Pairs**
    - **Filler Word Pairs:** Attended talker will swap ears
    - **Nonword Pairs:** Attended talker will swap ears and there will be a nonword item
  - *Will be held constant across lists!!*
    - Not within subject
  - **Only have one task:** select which orthographic representation the attended talker said
  - Want to balance Ear Assignment and Word/Nonword 50/50 → 80 pairs
    - **Divide up and balance Nonword Pairs, Filler Word Pairs, and Critical Trials**
    - E.g., 20 Critical Trials will be consistently in Ear 1
      - Critical trials always have attended voice consistently in Ear 1
  - **No longer need Catch Trials (Type 1)!!**
- **Test Blocks**
  - Blocking by talker or intermixing: pros and cons
  - Test ear specific adaptation?
    - Vroomen paper
  - **Justify choices**
