- **Upcoming Deadlines**
    - *Undergraduate Biology Program* <u>*Poster Session*</u>
        - Tentative date: Friday 9/30, from 3:30 - 5pm
        - Will need to register!

- **Check in: Samuel 2016**
    - Implementing SOA → arguments for and against
        - Really, I want to understand what the argument is to include it
            - *See the 3 summaries*
- **Housekeeping**
    - Expectations/timeline for the semester
        - Possibly have data for poster presentation on 9/30
        - Finish data collection and majority of analyses by 12/22 (end of fall semester)
        - Written sections that should be drafted?
            - Introductio
            - Methodology
            - ?
        - Possibly begin running Exp. 2 over winter break or beginning of spring
            - May have enough time to incorporate it into larger paper
                - *My spring semester should also be considerably light*
    - **What do you hope to see from me?**

- **Updates**
    - Currently working with the R studio code
        - Table looking good?
        - Ear assignment not originally included → just for example or was there a reason?
        - Anything else I should include?
            - Don't I need to add the orthographic .pngs or something?
    - Methodology revision is slow going
        - *Super hectic last few weeks → my life is in shambles, what else is new :/*
- **Down the line**
    - Need to create the written response choices ("Word" vs "Nonword")
    - Duration of each trial
        - (Before and after audio)
    - Writing up instructions
        - Introduction → directly address what the experiment is comparing or stay very high level and focus on task
    - Types of surveys/personal data collection (e.g., IRI questionnaire, gender)
        - Nothing that would be considered sensitive!! → IRB Prep?
    - Set up email box
